

## Nageze Joint Pain

Designed to manage pain and inflammation every day, naturally.

### Summary

- Dual action: analgesic and anti-inflammatory activity targeting pain and inflammation in mild arthritic conditions.\*
- Strong safety profile - no known interactions - allowing daily anti-inflammatory relief.
- Stomach and liver friendly\* and can be taken on an empty stomach.

Please note: all indications based on Traditional Chinese Medicine and Ayurvedic principles.

### Target Patient

People with persistent recurring joint pain who require regular anti-inflammatory pain relief and:

- who cannot use pharmaceutical anti-inflammatory pain relief (NSAIDs or CO X2 inhibitors) due to hypertension, gastro intestinal issues or other interactions or polypharmacy concerns;
- who may not get adequate pain relief from their current medication or would like to reduce their current dosage and may like to supplement with Nageze for additional support\*;
- are concerned with the long term side-effects of their current medication; and/or,
- who are just looking for a natural alternative for pain relief

If you're considering making any changes to your pain management please consult your health care professional/practitioner.

### Active Ingredients

All naturally derived ingredients.

Each capsule contains: **TermiPain®** (*Terminalia chebula*) extract, dry conc. equiv. to dry fruit 1.25g std. to chebulinic and chebulagic acids 50mg. **Turmeric BetaSorb®** (*Curcuma longa*) extract, dry cone. equiv. to dry rhizome 2.25g std. to curcuminoids 45mg.

**Turmeric BetaSorb®** is a full spectrum turmeric extract that includes curcumin, turmerones and other essential oils from turmeric. Together these are complexed with **BetaSorb®** technology for improved absorption and bioavailability.

**BetaSorb®** is a proprietary sugar-based delivery system that improves bioavailability in three ways:

1. Ensures water solubility (ingredients are absorbed more effectively if they are dissolved in water);
2. Prevents premature degradation (stops active ingredients from being damaged by stomach acids); and,
3. Improves absorption (transports active ingredients through cell membranes and into the body to work).

### Dosage

All Nageze products are designed for simple compliance:

- Commence with 2 capsules daily for the first 5 days.
- Continue with 1 capsule daily or with food

Can be taken on an empty stomach.

Swallow whole with water.

Capsules may be separated and powder poured into juice or other liquid - but avoid hot liquids.

### Precautions and Contraindications

All Nageze products are free from wheat, gluten, salt, yeast and animal products (including dairy, shellfish and seafood derivatives) and contain no artificial colours, flavours or preservatives.

**Always read the label. Use only as directed.**

Always consult your health professional before changing medication or if you have any concerns..
